- 17 Enhanced Due Diligence
- 18 Grievance Mechanism

4 ASSURANCE & ANNEXURES

- 19 Training & Awareness
- 20 Records · Audit · Reporting
- A Supplier Risk Scoring
- B KYC Onboarding Checklist
- C Red Flag Register

CEO / Management Statement

“

Siramamba Refinery (FZC) is unequivocally committed to the responsible and ethical sourcing of gold. We recognise that the gold supply chain carries inherent risks — conflict finance, human rights abuses, money laundering, bribery, and fraudulent misrepresentation of origin. This Policy is our formal, public commitment to address and manage these risks in full compliance with the UAE Ministry of Economy DDRG Rules, Ministerial Decision No. 68/2024, and the OECD Due Diligence Guidance (Annex II).

We will not engage with, nor benefit from, any supplier, trader, or intermediary that directly or indirectly contributes to armed conflict, serious human-rights violations, money laundering, or tax evasion. Where risks cannot be fully eliminated, we commit to measurable mitigation, continuous monitoring, supplier engagement, and transparent reporting to the UAE Ministry of Economy.

[Authorized Signatory]

Partner / Managing Director · Siramamba Refinery (FZC)

CA Ritesh Khara

Compliance Officer / MLRO · Vedas Vision Accounting & Auditing LLC

PUBLIC COMMITMENT: This Policy is published at www.siramamba.ae and communicated to all employees, management and suppliers on onboarding and annually. Any party that does not accept these commitments shall not be engaged or retained.

Introduction & Purpose

2.1 BACKGROUND

Gold is among the most traded commodities globally, and the UAE is a leading hub for refining and trade. Yet gold supply chains — especially Artisanal & Small-scale Mining (ASM) in Conflict-Affected & High-Risk Areas (CAHRAs) — carry significant exposure to financial crime, human-rights violations, environmental damage and reputational risk.

Siramamba Refinery processes and refines gold from various origins, including suppliers in Guinea and the broader West African region — areas classified as CAHRAs by the OECD. This Policy establishes the framework by which Siramamba identifies, assesses and manages risk across its entire gold supply chain.

2.2 PURPOSE OF THIS POLICY

- i Establish formal commitments consistent with OECD Annex II — the model supply-chain policy for minerals from CAHRAs.
- ii Ensure full compliance with the UAE MOE DDRG Rules and Ministerial Decision No. 68/2024.
- iii Define roles, responsibilities and accountability for supply-chain due diligence.
- iv Provide a systematic framework for KYC, risk assessment, EDD and transaction monitoring.
- v Demonstrate Siramamba's commitment to responsible business conduct to regulators, customers and the public.

Scope of Application

Category	Coverage
Entities	Siramamba Refinery (FZC) and all its operations, branches and activities
Personnel	All employees, management, partners, authorized signatories, contracted personnel and agents
Supply Chain	All suppliers, traders, intermediaries, exporters and logistics providers involved in procuring and delivering gold
Geography	All sourcing origins, with heightened focus on CAHRAs (Guinea, West Africa and other conflict-affected regions)
Gold Types	Mine Gold (LSM & ASM), Dore Bars, Refined Gold, Scrap Gold, Recycled Gold and all gold-bearing materials
Transactions	All procurement, purchase and acceptance transactions involving gold material

THE RULES WE COMPLY WITH

Regulatory Framework

OECD Annex II — 3rd Ed.

OECD Gold Supplement

UAE MOE DDRG Rules

Min. Decision 68/2024

Decree-Law 10/2025

Cabinet Res. 71/2024

FATF R.22 / R.24

EITI

Regulation / Standard	Jurisdiction	Key Requirement
UAE MOE DDRG Rules	UAE	Mandatory 5-step supply-chain due diligence for all UAE gold refineries
Ministerial Decision No. 68/2024	UAE	Updated responsible-sourcing duties; fit & proper test; CO appointment; employee KYC
Federal Decree-Law No. 10/2025 (AML/CFT)	UAE	AML/CFT obligations, goAML reporting, STR/SAR filing, CDD (AED 55,000 trigger)
Cabinet Resolution No. 71/2024	UAE	Administrative fines for AML/DNFBP breaches — up to AED 1,000,000 per offence
OECD Due Diligence Guidance + Gold Supplement	International	Global benchmark; Annex II model policy; 5-step risk-based framework
FATF Recommendations (R.22, R.24)	International	CDD, beneficial ownership and STR reporting for DNFBPs / gold dealers

Definitions & Glossary

CAHRAs

Conflict-Affected & High-Risk Areas — regions of instability, repression, weak institutions or violence where gold extraction may be linked to serious abuses.

ASM — Artisanal & Small-scale Mining

Mining using rudimentary tools, typically informal individual miners or small groups. Sourcing from ASM in CAHRAs carries elevated risk.

LSM — Large-scale Mining

Industrial mining by formally registered, licensed corporate entities with industrial equipment and formal governance.

Dore Bar

A semi-pure gold/silver alloy produced at the mine site before refining. Siramamba primarily receives Dore from West African mine suppliers.

Supply Chain Due Diligence

The ongoing process of identifying, assessing, managing and disclosing supply-chain risk, per the OECD 5-Step Framework.

Chain of Custody

A documented, traceable record of every party that handled or owned the gold from mine site to refinery, establishing verified origin.

KYC — Know Your Customer

Verifying the identity, ownership, business activity and risk profile of a supplier, customer or business partner.

Red Flag

A warning sign that a transaction, supplier or relationship may be linked to ML, FCP, conflict minerals or other Annex II risks.

Definitions & Glossary

CDD / EDD

Customer Due Diligence is the standard ID & verification process (AED 55,000 trigger for DPMS). Enhanced DD adds measures for high-risk cases.

PEP — Politically Exposed Person

An individual holding a prominent public function, or their close associate/family. PEP status triggers EDD.

UBO — Ultimate Beneficial Owner

The natural person who ultimately owns or controls an entity — directly or indirectly holding ≥25% of shares or voting rights.

MLRO

Money Laundering Reporting Officer — receives internal STRs/SARs and reports to the UAE FIU via the goAML portal.

XRF Testing

X-Ray Fluorescence — a non-destructive technique to verify the elemental composition and purity of gold received at the refinery.

Regulated Entity

A UAE gold refinery subject to the MOE DDRG Rules. Siramamba Refinery (FZC) is a Regulated Entity.

STR / SAR

Suspicious Transaction / Activity Report filed to the UAE FIU through goAML when money-laundering risk is identified.

goAML

The UAE Financial Intelligence Unit's reporting platform for STRs, SARs and related regulatory filings.

The OECD Due Diligence Guidance

The OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas is the first government-backed multi-stakeholder framework for responsible mineral sourcing. It is global in scope, applies to all minerals, and is built on a five-step, risk-based process. The Gold Supplement (2012) tailors it specifically to refiners and the gold trade, including ASM gold.

2010

Guidance adopted

OECD Council recommendation — the founding framework for mineral supply-chain due diligence.

2012

Gold Supplement

Tailors the 5 steps to gold refiners and distinguishes mined, recycled and grandfathered gold.

2016

3rd Edition

Current edition; Annex II model policy is the global benchmark referenced by the UAE MOE.

Today

Embedded in law

Mandated through the UAE MOE DDRG Rules, LBMA RGG, RMI and EU Conflict Minerals Regulation.

WHY THE OECD MODEL UNDERPINS THIS POLICY

Risk-based, not zero-risk

Companies are expected to manage and mitigate risk progressively — not simply avoid all CAHRA sourcing, which would harm legitimate ASM livelihoods.

Process over outcome

Due diligence is judged on the quality of the ongoing process — identify, assess, respond, audit, report — not a one-time certification.

Whole-of-chain

Every actor from mine to market carries responsibilities proportionate to their position; refiners are a critical point'.

OECD Annex I — Five-Step Framework

Annex I sets out exactly what a company must do at each step. Siramamba operates all five on a continuous, risk-based cycle.

1

STEP 1 • Establish strong company management systems

(A) Adopt & commit to a supply-chain policy (B) Structure internal management to support due diligence (C) Establish controls & transparency / chain of custody (D) Strengthen supplier engagement (E) Establish a grievance mechanism

2

STEP 2 • Identify & assess risks in the supply chain

Identify the factual circumstances of extraction, trade, handling & export from CAHRAs — then assess them against the standards of your Annex II supply-chain policy.

3

STEP 3 • Design & implement a strategy to respond to risks

(A) Report findings to senior management (B) Adopt a risk-management plan — mitigate & trade, mitigate & suspend, or disengage (C) Implement, monitor & track performance, then re-assess.

4

STEP 4 • Carry out independent third-party audit

An independent audit of due-diligence practices at identified points in the chain (e.g. the refiner) verifies the system works in practice, not just on paper.

5

STEP 5 • Report on supply-chain due diligence

Publicly report each year on due-diligence policies and practices to build the confidence of regulators, customers and the public.

OECD Annex II — Policy Commitments

Annex II is the OECD's model supply-chain policy. Siramamba adopts all of its commitments. The first two are absolute prohibitions (zero tolerance, immediate disengagement); the remainder require active mitigation, monitoring and supplier engagement.

6.1

PROHIBITION

Non-State Armed Groups

No tolerating, facilitating or benefiting from gold that directly or indirectly finances or supports any non-state armed group. Zero tolerance.

6.2

PROHIBITION

Serious Human-Rights Abuses

No engagement with any party implicated in torture, forced or child labour, unlawful killings or sexual violence. Confirmed evidence triggers immediate disengagement.

6.3

MITIGATE

Public / Private Security Forces

Where security forces are present at mine sites, verify legal authorisation, absence of extortion or abuse, and require human-rights clauses in contracts.

6.4

MITIGATE

Anti-Bribery & Origin Integrity

No bribes to conceal or misrepresent gold origin or evade taxes. Origin verified via chain-of-custody docs, XRF, photography and supplier declarations.

6.5

MITIGATE

Anti-Money Laundering

Screen all suppliers and transactions; file STRs/SARs via goAML; monitor transactions; refuse any deal where source of gold or funds cannot be verified.

6.6

MITIGATE

Taxes, Fees & Royalties

Ensure suppliers have paid applicable taxes, licence fees, export duties and royalties; retain evidence; escalate to EDD where evidence is missing.

OECD Annex III — Risk Mitigation

Annex III explains how to respond once a risk is found. Except for the absolute prohibitions — serious abuses and support to non-state armed groups, which demand immediate disengagement — most risks may be mitigated while trade continues, provided improvement is measurable.

1. Mitigate & Continue

Keep trading while pursuing measurable, time-bound mitigation — used for indirect support to security forces, bribery, money laundering or unpaid taxes/royalties.

2. Mitigate & Suspend

Temporarily pause trade while mitigation continues, under a revised plan with clear performance objectives that must be met before resuming.

3. Disengage

Exit the supplier after failed mitigation, or where the risk is unacceptable or mitigation is not feasible. Mandatory for all Annex II prohibitions.

THE SIX-MONTH RULE (PUBLIC / PRIVATE SECURITY FORCES)

If within 6 months of adopting the risk-management plan there is no significant, measurable improvement against direct or indirect support to public or private security forces, the company must suspend or discontinue engagement with the supplier for a minimum of 3 months.

BUILDING THE RISK-MANAGEMENT PLAN

- Consult affected suppliers & stakeholders
- Set measurable, time-bound improvement objectives
- Monitor, track performance & report to senior management

MEASURING IMPROVEMENT (INDICATORS)

- Qualitative & quantitative indicators of progress
- e.g. security providers meet the Voluntary Principles; illegal taxation ends
- Economic & development opportunity for ASM miners (formalisation)

Governance, Roles & Responsibilities

FIT & PROPER TEST (Step 1.2.3): A Fit & Proper test and full KYC must be completed for the CO, MLRO, and all procurement & finance staff at appointment and annually — passport/ELC qualifications, criminal & sanctions screening, and employment verification, retained in the Employee KYC File.

The OECD 5-Step Due Diligence Framework

The UAE MOE DDRG Rules mandate full implementation of all five OECD steps. Siramamba operates each step on a continuous, risk-based cycle.

Steps 1–5 are detailed individually on the slides that follow.

Step 1 — Strong Company Management Systems

Step 1 builds the internal foundation: a published policy, accountable people, trained staff, robust records and a working grievance channel — the controls a refiner must have in place before sourcing.

REQUIRED MANAGEMENT SYSTEMS

- **Supply Chain Policy** — this signed, published document (SRF-SCP-001/26)
- **Compliance structure** — CO/MLRO appointed; internal CO; clear delegation
- **Employee KYC** — fit & proper test for CO, finance & procurement
- **Training program** — annual calendar; new joiners within 30 days
- **Recordkeeping** — 5-year retention; available for MOE inspection
- **Grievance mechanism** — confidential channel for staff & third parties

SIRAMAMBA IMPLEMENTATION STATUS

- **Policy & grievance** — Completed — published on website
- **KYC of suppliers** — Completed — procedure in Section 14
- **CO / MLRO appointment** — In progress — internal CO to be named
- **Employee KYC & fit-proper** — In progress — templates in Annex B
- **Training rollout** — In progress — see Section 19
- **Internal audit cycle** — In progress — six-monthly, Section 20

Step 2 — Identify & Assess Risks in the Supply Chain

Step 2 maps the chain from mine to refinery and assesses each counterparty and transaction against counterparty, geographic and transaction risk factors, recording the outcome in a formal Risk Register.

HOW RISK IS IDENTIFIED

- **Supply-chain mapping** — trace gold from pit to port to refinery
- **Counterparty KYC** — ownership, UBO, PEP, sanctions, adverse media
- **Geographic screening** — CAHRA status, conflict, governance, FATF lists
- **Transaction review** — value, payment method, purity, documents
- **Red-flag scanning** — against the indicators in Section 16

RISK REGISTER — MANDATORY RECORD

- **Supplier & factors** — name and each risk factor identified
- **Score & justification** — heat-matrix score with written rationale
- **Decision** — Approve / EDD / Suspend / Exit
- **Approver & date** — who decided and when
- **Next review date** — driven by risk level (Section 14.2)
- **Inspection-ready** — updated at every KYC review & key event

Step 3 — Design & Implement a Risk-Management Strategy

Step 3 turns assessment into action. Based on the risk score, Siramamba mitigates and continues, mitigates while monitoring, or disengages — always with documented senior-management decisions.

RESPONSE OPTIONS (RISK-BASED)

- **Continue trade** — low risk — standard CDD and monitoring
- **Mitigate & monitor** — measurable risk-mitigation plan with milestones
- **Enhanced controls** — EDD, site visits, third-party verification
- **Suspend** — pause engagement pending investigation
- **Disengage / exit** — mandatory for Annex II absolute violations

CONTROLS & ESCALATION

- **Risk appetite** — Board-approved thresholds drive each response
- **Senior approval** — written sign-off for all HIGH / CRITICAL cases
- **Mitigation tracking** — progress reviewed; failure escalates to exit
- **Ongoing monitoring** — transaction & relationship surveillance
- **Documentation** — every decision recorded with justification

Step 4 — Independent Third-Party Audit

Step 4 provides external assurance. Independent auditors test whether the due-diligence system actually works in practice, at defined points in the supply chain, and report findings to management and the MOE.

AUDIT PROGRAM

- **AML/CFT internal audit** — every 6 months — CDD, STR, goAML, monitoring
- **Supply-chain DD audit** — annually — full 5-step implementation review
- **Document inventory review** — quarterly — file completeness check
- **Scope tested** — KYC, risk registers, red-flag & EDD execution

AUDIT REPORT REQUIREMENTS

- **Scope & methodology** — what was examined and how
- **Findings & risk ratings** — issues classified by severity
- **Corrective actions** — recommendations with owners & deadlines
- **Management response** — agreed remediation and timeline
- **MOE availability** — provided on request / in annual report

Step 5 — Report on Supply-Chain Due Diligence

Step 5 closes the loop with transparency. Siramamba submits an annual Comprehensive Management Report to the UAE Ministry of Economy and publishes its commitment to responsible sourcing.

ANNUAL MOE REPORT CONTENTS

- **Governance** — management structure and accountability
- **Risk procedures** — how risks are identified and assessed
- **Mitigation measures** — actions taken during the period
- **EDD decisions** — high-risk cases and outcomes
- **Audit findings** — results and corrective actions
- **Grievances** — cases received and resolved

DISCLOSURE PRINCIPLES

- **Annual cadence** — report submitted to MOE each year
- **Commercial sensitivity** — protect confidential data while transparent
- **Public statement** — responsible-sourcing commitment on website
- **Forward commitments** — next-period objectives stated
- **Retention** — report kept for 10 years

KYC & Supplier Due Diligence

Document / Information	Mine Supplier (CAHRA)	UAE Gold Trader	Recycled / Scrap	Good Delivery Bar Supplier
Trade Licence / Business Registration	✓	✓	✓	✓
Articles of Association (dated)	✓	✓	✓	✓
Mining Licence	MUST	if appl.	—	—
Export Licence	MUST	if appl.	if appl.	—
UBO Declaration, ID & Sanctions/PEP Screening	✓	✓	✓	✓
Bank Account Details & SWIFT	✓	✓	✓	✓
Mine Location Map / GPS Coordinates	MUST	—	—	—
ASM / LSM Declaration	MUST	—	—	—
OECD Annex II Compliance Declaration	✓	✓	✓	✓
Good Delivery Bar Serial Numbers	—	if appl.	—	MUST
XRF / Lab Analysis & Acceptance Photography	✓	if appl.	✓	✓
Risk Classification + Justification	MUST	✓	✓	✓

MUST = mandatory ✓ = required — = not applicable

CRITICAL RULE — MINING LICENCE

Where a mining licence is not available for a mine-gold supplier, this is an automatic HIGH-RISK classification. Procurement must NOT proceed until the CO/MLRO issues a written risk-acceptance decision. EDD and senior-management review are mandatory, and a supplier who persistently fails to provide a licence must be exited.

KYC REVIEW FREQUENCY

LOW: every 3 years

MEDIUM: every 1 year

HIGH: every 6 months

CRITICAL: suspend immediately

Risk Assessment Framework

1. Counterparty Risk

- Legal form, ownership & UBOs
- Jurisdiction of incorporation & operation
- PEP status of directors / UBOs
- Adverse media & sanctions (OFAC, UN, EU, UAE)
- Shell / nominee / complex structures
- Mining-licence validity & compliance

2. Geographic Risk

- CAHRA classification (OECD/UN/EU)
- Active armed conflict or insurgency
- Governance & rule-of-law index
- Corruption Perceptions Index score
- FATF grey / black list status
- Smuggling corridors & traceability

3. Transaction Risk

- Value vs. historical profile
- Payment method (cash / third-party = high)
- Gold type vs. declared supplier type
- Purity / assay vs. XRF report
- Shipping & customs documents
- Sudden volume variance

RISK HEAT MATRIX (Likelihood × Impact)

Impact ↓ / Likelihood →	Rare	Unlikely	Possible	Likely	Almost Certain
Catastrophic	5	10	15	20	25
Major	4	8	12	16	20
Moderate	3	6	9	12	15
Minor	2	4	6	8	10
Insignificant	1	2	3	4	5

SCORE → ACTION

- 1–4 LOW** — Standard CDD
- 5–9 MEDIUM** — Enhanced monitoring
- 10–14 HIGH** — EDD required
- 15–25 CRITICAL** — Senior approval

Red Flags & Transaction Monitoring

Every employee is trained to spot red flags and must report them immediately to the Internal CO. A red flag does not prove wrongdoing — but it must always be investigated and documented before any transaction proceeds.

! Supplier Red Flags

Missing mining/export licence; unclear UBO; PEP link; sanctions hit; adverse media; fake certificates; unknown supplier offering unusual volumes.

! Location Red Flags

Active conflict zones; FATF grey-listed countries; known illicit-gold routes (Guinea, Mali, DRC); routing through multiple jurisdictions without reason.

! Transaction Red Flags

Cash or third-party payment; round-figure deals; price far below market; inconsistent purity; gold-type mismatch; excessive urgency; backdated docs.

! Documentation Red Flags

Altered export certificates; missing XRF reports; photocopied licences; customs vs. KYC mismatch; chain of custody cannot be confirmed.

! Behavioural Red Flags

Pressure for fast processing; refusal to answer KYC; different information to different staff; unexplained change of representative or bank details.

! Structural Red Flags

Opaque corporate structures; offshore secrecy jurisdictions; shell companies; UBO is a government official/PEP; very recently established, no track record.

RED-FLAG RESPONSE PROTOCOL

(1) DO NOT PROCEED → (2) Document in the Red Flag Register → (3) Report to Internal CO within 2 hours → (4) Internal CO escalates to CO/MLRO within 24 hours → (5) CO/MLRO decides to investigate / suspend / file STR via goAML. Every decision documented with justification.

MANDATORY FOR HIGH & CRITICAL RISK

Enhanced Due Diligence (EDD)

EDD goes beyond standard CDD for all high-risk and critical-risk suppliers and transactions, adding deeper verification, senior approval and enhanced ongoing monitoring.

EDD Measure	Description & Application	Required For
Senior Management Approval	Written approval from Partner/MD before proceeding with any high-risk supplier or unusual transaction, with documented justification.	All HIGH & CRITICAL
Source-of-Gold Verification	GPS coordinates, mine-site photographs, independent assay, customs export docs, chain of custody from pit to port.	Mine gold from CAHRAs
On-site Supplier Visit	Management visit to mine/office/warehouse; formal visit report with findings, persons met and photographic evidence.	HIGH-risk mine suppliers (annual)
UBO Enhanced Verification	Third-party database search (D&B, World-Check, LexisNexis); adverse-media search; sanctions cross-reference; legal opinion if needed.	All high-risk counterparties
Transaction-Frequency Monitoring	Monthly review of volumes, patterns and consistency vs. baseline supplier profile; variance documented to CO/MLRO.	HIGH-risk — monthly
Third-Country Routing Assessment	Full documentation of each transit stage, customs declarations and verification of that country's OECD compliance.	Multi-jurisdictional chains

Grievance Mechanism

Aligned with Step 1.5 of the MOE DDRG Rules and the UN Guiding Principles on Business & Human Rights, Siramamba operates a confidential channel for anyone to raise concerns about its gold sourcing.

SUBMISSION CHANNELS

Email: compliance@siramamba.ae

Written: Addressed to CO/MLRO

Website: www.siramamba.ae/grievance

Anonymous: Anonymous submissions accepted

Confidentiality: Guaranteed — strict no-retaliation policy

WHO CAN SUBMIT

- All employees of Siramamba Refinery
- Suppliers, agents and business partners
- Local community members affected by the supply chain
- Customers and third parties
- Any person with concerns about gold-sourcing practices

Training & Awareness Program

Training Module	Target Audience	Frequency	Assessment
UAE MOE DDRG Rules & OECD 5-Step Framework	All staff	Annual; joiners ≤30 days	MCQ test (70% pass)
OECD Annex II — Responsible Sourcing Commitments	All staff & management	Annual	Acknowledgement sign-off
AML/CFT for DNFBPs — Decree-Law 10/2025	CO, MLRO, Finance, Procurement	Annual / on amendment	Certificate (ICA / external)
KYC, CDD & EDD — Practical Application	Procurement, Finance, Internal CO	Annual	Case-study exercise
Red-Flag Identification — Gold Supply Chain	All staff	Annual + as needed	Scenario test
ASM vs LSM Gold — Classification & Risk	Procurement, CO, Management	Annual	Attendance record
Grievance-Mechanism Awareness	All staff & suppliers	Annual	Attendance record

Records, Audit, Reporting & Review

DOCUMENT RETENTION (Step 1.3.7)

Document Category	Retention
Supplier KYC files	5 yrs
Transaction records (invoice, BL, customs)	5 yrs
Risk register & assessments	5 yrs
XRF / lab & acceptance photography	5 yrs
Good Delivery bar serials	Permanent
Screening results (sanctions)	5 yrs
STR / SAR filings (goAML)	10 yrs
Employee KYC & training	5 yrs
Internal audit reports	5 yrs
Annual MOE compliance report	10 yrs

GOLD-TYPE ACCURACY — ZERO TOLERANCE

Records must reflect the true form of gold — Mined (LSM/ASM), Dore, Scrap or Recycled. Mined gold must NEVER be recorded as Scrap. Any mislabelling is corrected with a full audit trail and root-cause review.

INTERNAL AUDIT & INDEPENDENT REVIEW

AML/CFT internal audit — every 6 months

Supply-chain DD audit — annually (MOE Step 4)

Document inventory review — quarterly

ANNUAL REPORTING TO MOE (Step 5)

A Comprehensive Management Report is submitted to the UAE Ministry of Economy each year, covering governance, risk procedures, mitigation, EDD decisions, audit findings, grievance cases and forward commitments.

POLICY REVIEW TRIGGERS

Reviewed every June, and immediately on any change to UAE DDRG/AML law, an MOE inspection finding, a change of ownership/structure, or a new CAHRA sourcing origin — then re-approved, re-published and re-communicated.

Supplier Risk Scoring Summary

Supplier	Origin / Country	Gold Type	Risk	Primary Risk Basis	Next Review
DJALLAKARO MINING SARLU	Conakry, Guinea (CAHRA)	ASM Dore	HIGH	No mining licence; CAHRA origin; no site-visit report	Dec 2026
ETS. CONDE KARIFA SARLU	Conakry, Guinea (CAHRA)	Dore	HIGH	No mining licence; AOA date missing; CAHRA origin	Dec 2026
HYPRO MINING SARLU	Conakry, Guinea (CAHRA)	Dore	HIGH	No mining/export licence; UBO screening missing	Dec 2026
KONDOU BUSINESS GOLD SARLU	Conakry, Guinea (CAHRA)	Dore	HIGH	No mining licence; AOA & bank details missing	Dec 2026
UDS GOLD TRADING LLC	Dubai, UAE	Mined (via UAE)	HIGH	Mine-gold type not declared; no licence; origin unclear	Dec 2026

ACTION NOTICE — ALL FIVE SUPPLIERS

All suppliers above were reclassified to HIGH RISK following the AML/CFT/CPF and responsible-sourcing compliance review. Siramamba must complete EDD for each by December 2026 or suspend engagement. Each mining-licence deficiency must be resolved with a documented management decision.

KYC Document Checklist — Onboarding

Completed by the Internal CO for every new supplier. The file must be reviewed and signed by the CO/MLRO before any transaction proceeds.

Document / Requirement	Obtained	Verified	Remarks / Reference
Trade Licence / Business Registration Certificate	☐	☐	
Articles of Association (with dated signatures)	☐	☐	
Mining Licence (mine-gold suppliers only)	☐	☐

Red Flag Register — Template

Every identified red flag is logged here in real time. The register is a mandatory document for MOE inspection and must be retained for five years.

Date	Supplier / Transaction	Red-Flag Description	Reported By	CO Decision	STR Filed?

Siramamba Refinery (FZC)

Ref: SRF-SCP-001/26 · 25 June 2026 · MOE DDRG · OECD Annex I–III · AML/CFT · CONFIDENTIAL

OUR COMMITMENT

Responsible gold, every step from mine to market.

Siramamba Refinery (FZC) implements the OECD 5-Step Due Diligence Framework and the UAE MOE DDRG Rules in full — with zero tolerance for conflict finance and serious human-rights abuse, and active mitigation of every other supply-chain risk.
